

VACTOR®

Subsidiary of Federal Signal Corporation

ENVIRONMENTAL POLICY

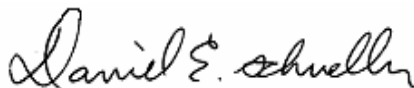

Vactor Manufacturing, a subsidiary of Federal Signal Corporation, is committed to the responsible design, manufacture and distribution of mobile vacuum systems for sewers, catch basins, and heavy industrial applications. Vactor serves the environmental needs of communities, airports and industries throughout the world.

Vactor is committed to comply with all applicable legal and other requirements related to the design, manufacture and distribution of mobile vacuum systems. Vactor is particularly mindful of its potential impact to water quality, air quality and natural resources usage during the design, manufacture and distribution of its products.

Vactor has established annual improvement Targets and Objectives for its design, manufacture, and distribution processes in order to focus on the reduction of solid wastes, water usage and discharges, hazardous air emissions and natural resources consumption. Furthermore, Vactor supports the concept of continual improvement and pollution prevention through its establishment of Targets and Objectives, which are monitored, measured, and periodically reviewed in order to verify environmental performance.

Vactor's ISO 14001:2004 Environmental Management System requirements are applicable to and communicated to all employees, contractors and other persons working for or on its behalf. Vactor's Environmental Policy is available to the public by request or at Vactor's website (www.vactor.com)
