

Get a Grip on Easier Vacuuming

“ Because good operators are hard to come by, anything we can do to make their jobs easier is a benefit.”

*Phil Harbin, President
Harbin Services*

You and your operators know better than anyone that industrial cleaning is a dirty job. It's hard work.

That's why Guzzler Manufacturing, the world leader in industrial vacuum loaders, has introduced the new GuzzlerGrip™ line of productivity-enhancing, fatigue-reducing nozzles.

New Nozzles from the World Leader in Vacuum Loaders

GuzzlerGrip nozzles are everything you'd expect from the people who bring you the world's best vacuum loaders—smart, practical and easy to use. Designed to make the industrial cleaning professional's job easier and safer, these nozzles replace the broom and duct tape handles operators have been using to “make do” for years. On the new GuzzlerGrip nozzle line, you'll find:

- Handles positioned for comfort and ease of use, based on in-plant testing with other industrial cleaning professionals.
- Harnesses designed to better distribute the weight of the nozzle so your operator doesn't get tired so quickly.
- Smartly angled nozzle ends that make it easier to access the materials you're vacuuming.

Show Your Worth

You invest major dollars in your fleet, but when you go to work with jury-rigged hose handles, your customers may not recognize or appreciate the investment you've made in your vacuum loaders. Compare that with what your customer will see when your operators are using GuzzlerGrip nozzles. They'll see hard-working cleaning professionals on the job, taking care of their work environment.

The beauty is that your work will be a little easier and safer.

There's a GuzzlerGrip Nozzle for Your Operation

We think the GuzzlerGrip™ line will become a staple for every industrial cleaning operation. It includes shovel-headed nozzles that vacuum material as you loosen it, backbone and long-reach versions that help you get into those tough-to-reach locations, and the easy-lift nozzle designed to help relieve the strain from long hours of continuous vacuuming.

49469 – 6" Aluminum Easy-Lift Nozzle
49469A – 4" Aluminum Easy-Lift Nozzle

These new generation all-purpose vacuum nozzles are lightweight and comfortable to reduce fatigue and increase productivity.

49577 – 6" Aluminum Backbone Nozzle
49577A – 4" Aluminum Backbone Nozzle

The backbone nozzle offers the same features as the easy-lift nozzle but is designed with a replaceable vacuum hose, supported by a curved "backbone."

49572 – 4" Aluminum Long-Reach Nozzle
49572B – 6" Aluminum Long-Reach Nozzle

The long-reach nozzles are perfect for hard-to-reach and unsecure areas such as around conveyers and under machinery.

49572A – 4" Steel Long-Reach Nozzle

The steel construction provides extra durability for abrasive work, while still allowing you to vacuum in difficult-to-reach places.

49575 – 4" Aluminum Shovel Nozzle

Designed for a wide range of applications, the lightweight aluminum shovel nozzle allows you to loosen stubborn materials and vacuum at the same time.

1280389A – 4" Flat Shovel Nozzle

The flat shovel nozzles are your best choice when vacuuming clumped materials off flat surfaces and digging areas.

504073 – 6" Pit Cleaning Nozzle

The crowned steel end helps when vacuuming liquids from pits or manholes.
